

INDEX

Proceedings of The Northwest Fish Culture Conferences 1950-66

This Index contains separate author and subject references to the material presented at the first seventeen Northwest Fish Culture Conferences. The Proceedings were not published in 1953 so there are no entries for that year.

All references were taken from the table of contents in the proceedings of each conference and are listed according to author or subject, report title, and year. The subjects are quite general as they were categorized by using report titles. Many possible subjects have been cross-indexed to aid you find what you are looking for.

The Fish Commission of Oregon supplied the funds required to prepare and publish the Index. I wish to thank the office staff of the Clackamas Research Laboratory, Mr. Don Swartz and Mrs. Winona Richey for their assistance in organizing and processing the material.

Wallace F. Hublou
Chairman, 1966
