

RMIS-Standard Reporting System

Usage History Presentation

By: Jim Longwill, PSMFC Regional Mark Processing Center

Questions Considered

- Who has been using RMIS ? (last 4 years)
- How many rows do they select from the database?
- How much data do they download (bytes)?

Often an RMIS user will simply 'preview' data rows without running a report. This type of action will reflect that rows were selected, but no data was downloaded.

RMIS Usage History -- Charts

- **Types of organizations** which use RMIS;
- Metrics measured:
 - Number of **rows selected** from database;
 - Number of **bytes downloaded** from database;
- Time frame: during **last 4 years** (span):
 - Apr 1st, 2006 to Mar 31st, 2010
- **Types of data** examined:
 - Releases ■ Recoveries ■ Catch / Samples
