YAKA	19	!11	Bosch, Bill	bbosch@yakama.com

NOTE: Tag Prefix and Coordinator Codes are used to aid in management and tracking of release groups. At this time BLANK Wire releases are recorded using the "UnTagged Coordinator Code".

To determine the disposition of recovered tag codes, refer to the associated contact for the tag prefix(es).

\* Tag Prefix are derived from the first two characters on Code Wire Tags of "Tagged" release groups.

\*\* Coordinator Codes are derived from "!" character followed by 2 character coordinator code of "UnTagged" release groups.
